

Editing Your DBC Discussion List Settings in Google Groups

We weren't able to control some of the settings when we made the bulk upload of members to the new discussion list, such as real user names and how to get a digest of the messages. This is a brief overview of how to change those settings.

1. Visit the discussion list home page at <https://groups.google.com/a/davisbikeclub.org/g/dbc-list>. Click on the My Membership Setting link on the left-hand menu:

2. On the My Membership Settings window, update your display name to your real name, then choose your subscription method, each mail means you're up-to-date all day long, but also distracted all day long. There are also options for digest, which groups things up in sets of 25 (or at least once per day), abridged, which bundles up messages in groups of 150 (or once per day), or no email. Pro tip: if you never want to get any message, click the Leave Group button at the top of the page.
